

The Entry Level Solution For Receiving Electronic Applications
From The LABC Submit-a-Plan Portal

2010

Powered By DataSpace *Live* Technology

SNAP! Lite

SNAP! Lite is a new low cost, entry level solution to enable Local Authorities to become fully signed up members of the LABC Submit-a-Plan National Building Control Portal. www.submit-a-plan.com

SNAP! Lite is web based and designed to simply notify Local Authorities of applications submitted electronically on the LABC Submit-a-Plan Portal and enable them to be downloaded.

A major benefit for applicants using the LABC Submit-a-Plan Portal over inhouse developed systems is that applicants have a single login, standard forms and the same interface for every Local Authority, making the application process that much quicker and simpler.

If your authority is currently receiving applications via e-mail you will be aware of the issues faced when an application is received, such as incomplete forms, the application being too large for your mailbox and receiving file formats you cannot open. SNAP! Lite simply overcomes these issues.

How Does It Work?

Once setup, your customers will be able to submit electronic applications through the LABC Submit-a-Plan Portal.

You will receive a notification every time you receive an application, this will contain a link which will take you to the online application. You will then be able to download the application. It's as simple as that!!!

Low Cost Subscription

With SNAP! Lite there is no software to purchase or training required, we just simply switch you on!!! We just charge a small setup fee and annual subscription.

SNAP! Lite is continuously updated online ensuring that Local Authorities are always running on the latest version.
